

# Thoughts on Transit for Canada

# Concept

- Develop a generalized managed services offering
- Assure freedom of choice for fare transit processor and fare collection equipment
- Focus on economies of scale, Canadian built and privately managed
- Look to the 2010 Olympics as a Canadian target for global recognition
- Focus on Montreal as a time and material project
- Develop to suit MTO
  - GTA and Ottawa
  - With needed extensions to existing Hull solution
  - Revenue Sharing Built In
- Invite all Canadian transit agents to help define Open Interface Standard
- Learn from Calypso and RIS
